🪪 PROFILE

- Having around 2.5 years of front end experience in development and implementation of Web Applications by translating wireframes, design mock-ups into high quality, accessible User Interfaces.
- Have experience on ES6 JavaScript and React.js with hooks and understanding of using Typescript with React.js.
- Worked with front-end component libraries like Tailwind CSS for styling React component systems.
- Developed a good understanding of using state management tools like Redux to store and modify state globally by creating and dispatching Action Creators that deploy Actions.
- Creating and using Reducers that received said Actions to modify the Store State Tree and for easy retrieval of data in any component of the application.
- Have knowledge of using middleware such as redux-thunk, redux- toolkit to manipulate the data type and handle multiple actions
- Good Expertise in analyzing and debugging the Document Object Model (DOM) Layout, DOM Functions, and Java Script functions, Cascading Styles across cross-browser using Firebug, Chrome Debugger.
- Proficient in Integrating RESTful APIs, sending payload, and populating JSON response as per mockups.
- Having knowledge of implementing REST APIs with the use of Node.js, Express.js and MongoDB and establishing connectivity with Reactjs frontend with the use of Axios.
- Experience in Version Controlling with SVN, Git.
